

# Kofax Analytics for TotalAgility

## A COMPLETE VIEW OF BUSINESS PROCESSES

Kofax Analytics for TotalAgility® provides organizations using TotalAgility with the ability to analyze the effectiveness of their business processes. It includes a pre-packaged bundle of metrics, dashboards and reports. The solution also allows organizations to create new reports and dashboards based on a library of best practices metrics, and features pre-built content for capture-based processes.

Organizations can create new analysis records, metrics, dashboards and reports from the underlying TotalAgility data sources. Using this additional power, businesses have access to a full breadth of process intelligence and analytics for all of their TotalAgility project data. With actionable analytics, organizations can now make changes and improve processes, driven by analytics results.

## TOTALAGILITY—A VERSATILE PLATFORM

Kofax TotalAgility is an intelligent automation platform for digital transformation of business that combines mobility, cognitive capture, RPA, process orchestration, and analytics to simplify and streamline building intelligent automation processes. Without needing to modify any systems of record, organizations can design, process, develop and deploy applications— all on a single platform for lower TCO and faster time to market.

## BEST PRACTICES DASHBOARD LIBRARY

Analytics for TotalAgility provides organizations with a unified view of their entire operation, while also delivering the ability to quickly drill into the details of individual tasks managed by their TotalAgility environment. The library includes visualizations and analyses of both completed and ongoing processes.

# KOFAX

**“With the Kofax solution, we can rely on near-zero errors in our data entry and processing, which creates peace of mind for us and for our contractors.”**

**Jeff Stratton,**  
Senior Project Manager, AMN Healthcare

# PRODUCT SUMMARY

The solution also features pre-built content for capture-based processes, including document classification rates, field extraction rates, user productivity, operation costs, and more.

## INFORMATION WHEN YOU NEED IT

By providing access to operational metrics and analyses in near real time, organizations can use the most up-to-date information in their decision-making processes. These insights can also be easily shared with peers via a variety of collaboration features.

## PROCESS INTELLIGENCE

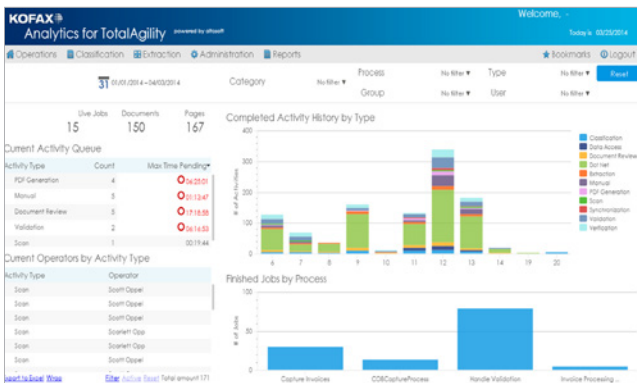

Users have access to analytics of content and process data which helps the business make informed, effective decisions, with process intelligence charts and simulations not only based on process steps, but on additional metrics such as state changes and milestone achievements. Through a variety of interactions with dashboard components, users are able to quickly drill into, filter and otherwise investigate operational data to discover important operating conditions and diagnose root causes.

## RAPIDLY CUSTOMIZABLE

In addition to dashboards and reports, Analytics for TotalAgility empowers non-technical users to create and share dashboards tailored to their unique operational requirements. This ensures that each user can always have access to the best analysis for their particular purpose.

Leverage Kofax Process Intelligence™ to extend the initial analytics investment to additional data sources and custom metrics.

Analytics for TotalAgility allows organizations to quickly and accurately discover and address critical issues that, if left unchecked, would lead to operational problems or missed opportunities. By exposing these previously unattainable insights, organizations can proactively improve their operational efficiency and mitigate the risks of non-compliant operational processes.

Integrated analytics platform for Kofax TotalAgility provides business user-friendly dashboards and ability to customize views and metrics, with no need for coding.
